Pollution Prevention Program
42 Second St. SW
Albuquerque, NM 87105

Dear Ms. Gutierrez:

I would like to commend you and your Division for a job "well done".
The Automotive Code of Practice that you have developed can only protect and enhance the quality of life of all the residents in Albuquerque and the surrounding areas.

By concentrating on a publication that takes into account the 'Best Management Practices' of the industry you have developed a reference manual that can be adopted by anyone in this segment of business, without imposing undue burdens and regulatory mandates that sometimes prove difficult to comply with for smaller entities.

We thank you for the opportunity to review and comment on the draft product, this is a great example of government and industry working together in partnership to promote a safer environment for our citizens.

Sincerely,

Victor J. Sheppard,
Managing Director.

VJS/jah
